

Jonathan Duran

Attleboro, MA 02703 | (401) 548-2986 | Jonathanduran56780@live.com | Website: jonathan-duran.github.io

HIGHLIGHT OF SKILLS

- Air Force Veteran and experienced Software Engineer
- Over 10 years of experience in designing, implementing, & optimizing large-scale, distributed systems with a focus on monitoring/observability, CI/CD, DevOps, & cloud-native technologies.
- Proficient in Python, JavaScript, Java, SQL, and cloud platforms (AWS, Azure).
- Passionate about leveraging open-source tools and strategies to drive scalability and performance.

EDUCATION

Master of Science: Computer Science | Worcester Polytechnic Institute | Worcester, MA - **GPA: 3.9** Dec. 2022
Bachelor of Science: Computer Science | Rhode Island College | Providence, RI - **GPA: 3.9** Dec. 2020
Associate of Science: Computer Studies | Community College of RI | Providence, RI - **GPA: 3.8** Dec. 2021
Associate of Science: Information System Technology | **Community College of the Air Force** Oct. 2018

Relevant Coursework: Data Structures, System Design, Algorithms, Databases, Computer Networking

PROFESSIONAL EXPERIENCE

Software Engineer | Kessel Run Air Force Software Factory | Boston, MA *Jul. 2023 – Present*

- Enhanced CI/CD pipelines, reducing deployment times by 20% and increasing automation efficiency and automated test coverage.
- Monitored cloud-based applications using public and private cloud environments and container-based technologies, ensuring system reliability, uptime and scalability.
- Implemented an observability and monitoring platform for a suite of 6+ applications, enabling real-time alerting, log aggregation, and performance analytics, resulting in a 90% reduction in incident response time and improved system reliability through log and metric instrumentation.
- Integrated front-end testing as part of the deployment pipeline for a JavaScript based application.

Cyber Systems Operations/ Tech. Sergeant | Air National Guard | Various Locations *May 2015 – Apr. 2024*

- Managed 200+ network accounts across three cyber weapon systems and ensuring security compliance.
- Managed virtualized and physical systems across secure Air Force infrastructure.
- Supported \$5M+ in equipment through system configuration, patching, and network setup.
- Led and mentored a team of 3 junior IT personnel in secure network and server operations.

Computer Scientist | Dep. of Transportation Volpe Center | Boston, MA *Feb. 2023 – Jul. 2023*

- Integrated real-time data from LIDAR and radar into machine learning-driven solutions on Nvidia Jetson Nano, leveraging cloud infrastructure for scalability.
- Contributed to cybersecurity documentation and debugging efforts across distributed systems.

Cyber Engineering Intern | *National Renewable Energy Laboratory* | Golden, CO *May 2022 – Aug. 2022*

- Deployed a cloud-based cyber-range service (Apache Guacamole) using Docker containers and SQL databases, improving access security with 802.1x and Radius MAC authentication.

IT Support Technician | Rhode Island College | Providence, RI *Aug. 2018 – Jan. 2021*

- Provided desktop, endpoint, and Active Directory support to academic staff and faculty.
- Assisted in software deployment and computer imaging for campus-wide rollouts, ensuring consistency and compliance across academic and administrative devices.
- Collaborated with faculty and IT staff to troubleshoot audiovisual and classroom technology issues, improving instructional delivery and minimizing downtime.

SKILLS

Certifications & Training: TOP SECRET Clearance, CompTIA Security+, CompTIA CySA+, Google Cloud Digital Leader

Languages: Java, Python, C, JavaScript, Typescript, SQL, Bash, HTML5, CSS3; **Frameworks:** Node.js, Spring Boot, React; **Networking & Systems:** TCP/IP, DNS, Linux administration, CI/CD pipelines, GitLab CI/CD; **Tools & Monitoring:** Prometheus, Grafana, Tempo, Git, Jira, YAML, Iron Bank; **Other:** REST APIs, JSON, Agile/Scrum, Observability, AWS, Azure, Docker, VMWare, Google Cloud, DevOps, Secure Coding, PostgreSQL
